

# Configure a CE to use a remote pbs\_server

Configure a CE to use a remote pbs\_server  
Configure a CE to use another pbs\_server

Publish the information in the site BDII of the other PBS adding in the file  
*/opt/lcg/libexec/lcg-info-dynamic-ce* the pbs\_server\_hostname

Instruct the globus gatekeeper to use the other pbs\_server adding export PBS\_DEFAULT=<PBS\_SERVER>  
in */etc/init.d/globus-gatekeeper*

On the PBS\_SERVER enabling the CE to submit jobs here

```
qmgr s s acl_hosts=<CE_HOSTNAME> s s acl_host_enable=true
```

adding <CE\_HOSTNAME> in */etc/hosts.equiv*

Publish the ssh key between the two host
