

# proxy

Configure proxy for apt

If your site use a HTTP/FTP proxy to use apt-\* you must set the following enviroment variable *http\_proxy*  
*ftp\_proxy*

You can make this setting site wide creating the following files

```
[root@ce-02 profile.d]# cat /etc/profile.d/http_proxy.sh
export http_proxy=http://proxy.site.net:3128
export ftp_proxy=http://proxy.site.net:3128
```

```
[root@ce-02 profile.d]# cat /etc/profile.d/http_proxy.csh
setenv http_proxy http://proxy.site.net:3128
setenv ftp_proxy http://proxy.site.net:3128
```
